EDUCATION

UNIVERSITY OF BOLOGNA

MSc IN DATA SCIENCE

Grad. Jul 2024 | Bologna, Italy
Grade: 110L

UNIVERSITY OF BOLOGNA

BS IN COMPUTER SCIENCE

Grad. Sep 2022 | Bologna, Italy
Grade: 108

SCIENTIFIC HIGH SCHOOL

Grad. Jul 2019 | Faenza, Italy

SKILLS

Python • R • SQL • NoSQL
Big Data • ETL • Data Viz
Statistical Analysis • Forecasting
Machine Learning • Deep Learning
Computer Vision • NLP • GenAI
Prompt Engineering • RAG • Agents
LLM Fine-Tuning (LoRA/QLoRA)
AI Evaluation • AI Governance
MLOps • Model Monitoring
Databricks • AWS • Azure
Agile • Git/Github

COURSEWORK

GRADUATE

Advanced Probability & Statistics
Constraint Programming
Modern Statistics & Big Data Analytics
Machine Learning for Data Science
Statistical Models & Applications
Stochastic Processes & Time Series
Supervised Statistical Learning

UNDERGRADUATE

Algorithms & Data Structures
Calculus & Numerical Optimization
Computer Architecture & Networks
Databases & Operating Systems
Linear & Constraint Programming
Logic & Theoretical Computer Science
Software Engineering
Web Development

EXPERIENCE

SIEMENS ENERGY | SENIOR DATA SCIENTIST

May 2026 – Present | Remote

- **Computer Vision Modernization:** Refactoring and rebuilding a legacy computer vision solution for automated information extraction from industrial images and technical documents.
- **AWS AI Engineering:** Working closely with AI Architects to redesign production AI workflows, improve maintainability, and strengthen cloud-native deployment practices on AWS.
- **Production AI Reliability:** Improving monitoring, logging, and lifecycle management for enterprise AI systems, with focus on scalable inference and operational robustness.

DATA REPLY | DATA SCIENTIST & AI ENGINEER

Jun 2023 – Present | Remote

- **GenAI Leadership:** Owned GenAI direction inside Hyper Automation; standardized evaluation, governance, and production delivery practices for enterprise LLM solutions.
- **Open-Source LLM Fine-Tuning:** Fine-tuned compact open-source models with LoRA/QLoRA for classification, extraction, and routing; automated evaluation pipelines with gold sets, regression tests, and safety checks.
- **AI Governance & Compliance:** Designed GenAI workflows aligned with EU AI Act principles, including traceability, auditability, structured logging, and responsible AI controls across Databricks and AWS.
- **Predictive Modeling Optimization:** Increased model accuracy by +12% on a multi-million-record dataset; reduced training time by 40% through feature engineering and automated HPO.
- **Process & Insight Automation:** Automated metadata extraction with Azure Computer Vision, removing 90% of manual checks and improving cross-team throughput by 30%.
- **Internal GenAI Platform:** Built reusable components for prompting, RAG, agents, and internal chatbots; increased automation success rate by +50% and cut information retrieval time by 60%.
- **Professional Certifications:** Databricks Generative AI Engineer Associate. AWS ML Specialty. OpenAI training completed during tenure.

DEVELOPE | AI & DATA TUTOR

May 2025 – Present | Remote

- **Teaching & Mentorship:** Tutor for AI and Data tracks; guide cohorts through ML fundamentals, GenAI workflows, hands-on labs, and code reviews.
- **Curriculum Enablement:** Designed practical projects covering ETL, feature engineering, RAG, agents, and data visualization, aligned with industry delivery patterns.
